

## Wheel Sensor Replacement

### NOTE:

- Be careful when installing the sensors to avoid twisting the wires.
- After sensor replacement, confirm proper operation (see page 19-129).

## **SUPPLEMENTAL RESTRAINT SYSTEM (SRS) (If body maintenance is required)**

Some versions of the KE and KG Civic 5D models include a driver's airbag, located in the steering wheel hub, and a front passenger's airbag, located in the dashboard above the glove box. The SRS unit of these model versions is not part of the airbag assembly and has built-in sensors (SRS Type III). Information necessary to safely service the SRS is included in this Shop Manual. Items marked with an asterisk (\*) on the contents page include, or are located near, SRS components. Servicing, disassembling or replacing these items will require special precautions and tools, and should therefore be done by an authorized Honda dealer.

### **▲ WARNING**

- To avoid rendering the SRS inoperative, which could lead to personal injury or death in the event of a severe frontal collision, all SRS service work must be performed by an authorized Honda dealer.
  - Improper service procedures, including incorrect removal and installation of the SRS, could lead to personal injury caused by unintentional activation of the airbags.
  - Do not bump the SRS unit. Otherwise, the system may fail in case of a collision, or the airbags may deploy when the ignition switch is ON (II).
  - All SRS electrical wiring harnesses are covered with yellow insulation. Related components are located in the steering column, front console, dashboard, dashboard lower panel, and in the dashboard above the glove box. Do not use electrical test equipment on these circuits.
  - Service work nearby and in the areas listed below may affect the SRS and must therefore be performed by an authorized Honda dealer.
- 
- Steering wheel
  - Behind the dashboard
  - Under-dash fuse/relay box
  - Front console
  - Car stereo unit and other accessories
  - A/C heater
