

# Troubleshooting

- Any abnormality must be corrected before continuing to the next test.
- Because of the precise measurements needed, use a digital voltmeter and ohmmeter when testing.

**Before performing any troubleshooting procedures check:**

Fuses	Grounds
No.32	G301 G101
No.31	G201 G281
No.18, 39 (Condenser & Compressor)	G401
No.15 (Cooling fan)	

- All electrical connetions are clean and tight.

## Symptom Chart

SYMPTOM	PAGE	CHART NO.
Only cooling fan does not run.	15-26	1
Only condenser fan does not run.	15-28	2
Compressor and cooling fans do not run.	15-30	3
A/C compressor does not come on. Cooling fans operate normally.	15-32	4
